

THE LIFEGUARD'S THIRD EYE

In the absence of a regulatory framework for drowning prevention computer vision technology and in order to guarantee our customers that our commitments are reliable, we have commissioned **TÜV Rheinland**, a well-known inspection and certification agency on the market for a study.

TÜV Rheinland has checked the Poseidon System interface on Sept. 20, 2012. All features of the system described in our sales materials and technical documentation have been validated and have resulted in a final report written by **TÜV** (available upon request).

TÜV Rheinland has measured the Poseidon System detection performance on September 20, 2012. Measurements have been performed according to a comprehensive procedure. The report made certifies that the system is compliant with the market requirements (available upon request as well).
